KANAMARLAPUDI ABHIJIT

Narasaraopet, AP, India
+91-7842595550
kanamarlapudiabhijit@gmail.com

High-impact Lead Data Engineer creating robust, scalable applications. Adept in various programming languages and frameworks, I excel in all stages of development, from design to deployment. Passionate about building innovative solutions and collaborating effectively.

Employment History

- Aug 2018 – Current Technical Lead Archents

Project Experience

Archents: Aug 2018 – Current

Client: RXO Logistics

Project 1: Migration of On-Premises DW to Azure SQL DB

Description: Migrated the on-premises Data Warehouse into Azure SQL DB using Azure cloud services such as Azure Data Factory, Azure Blob Storage, Azure SQL DB, Azure Logic Apps, and Azure Key Vault.

Responsibilities:

- Designed and implemented scalable **ETL/ELT pipelines** with Azure Data Factory, incorporating advanced data quality checks to ensure reliable analytics while meeting performance, scalability, and security requirements.
- Created dynamic Linked Services and datasets, reducing pipeline redundancy with configuration tables and optimized workflows.
- Created triggers for pipelines (daily, weekly, and monthly) and developed catch-up jobs for missed data synchronization.
- Supported module integration and validated environments to ensure smooth CI/CD pipeline operations using **Azure Devops**.
- Designed health check reports to analyze job history and data variance, ensuring data accuracy and integrity.
- Implemented Row-Level Security (RLS) and secure configurations to ensure data confidentiality, integrity, and availability.

- Ensured data governance, security, and metadata management while conducting periodic reviews to maintain compliance with organizational quality standards.
- Identified risks related to data inaccuracies and inefficiencies, implementing mitigation strategies that **reduced processing time by up to 60%.**
- Documented processes, technical decisions, and configurations to ensure reproducibility and knowledge transfer.

Project 2: Migration of Azure DW Between Tenants

Description: Migrated Azure services across tenants, including Azure SQL Database, Azure Data Factory, Logic Apps, Storage Accounts, SharePoint, Runbooks, and Power BI Gateways.

Responsibilities:

- Assessed existing Azure services and dependencies in the source tenant and designed a seamless migration strategy.
- Designed and optimized scalable data pipelines on Databricks using Apache Spark to integrate structured and unstructured data sources, ensuring seamless migration between Azure tenants while leveraging Delta Lake for reliable data versioning, consistency, and access control.
- Configured and validated software modules for tenant migration, maintaining version control and testing reliability.
- Created and rebranded Power BI reports, Gateways, and SharePoint sites to align with the new tenant structure.
- Conducted reviews of data workflows and compliance standards, identifying risks and proposing corrective measures.
- Collaborated with cross-functional teams to evaluate design solutions and optimize processes.
- Designed and maintained documentation, including technical guides and learning materials, to standardize processes and mentoring team members in development practices.

Project 3: Development and Maintenance of On-Premises DW, Power BI, and SSRS Reports

Description: Migrated SSRS and Power BI reports from an on-premises Data Warehouse to the cloud while optimizing reporting and visualization processes.

Responsibilities:

- Developed optimized Power BI dashboards with advanced visualizations and automated refresh schedules to ensure timely updates. Delivered actionable insights through trend analysis and impactful data storytelling.
- Applied Data Analysis Expressions (DAX) to create measures, calculated columns, and tables for advanced reporting needs.

- Designed secure system configurations for Power BI and SSRS environments, adhering to organizational policies and compliance standards.
- Created complex SSRS subscriptions, including conditional notifications and scheduled reports.
- Conducted extensive testing of ETL workflows, ensuring data accuracy and system performance through comprehensive test plans and automated frameworks.
- Developed and maintained complex ETL solutions using SQL Server Integration Services, optimizing data ingestion and transformation processes.
- Performed database maintenance tasks, monitoring SQL Server Agent jobs, and resolving faults while ensuring reliable data pipelines.
- Improved T-SQL query performance by creating Clustered and Non-Clustered Indexes and applying optimization techniques.
- Collaborated with stakeholders to define business intelligence needs, delivering actionable insights through dashboards and reports, while resolving technical challenges and providing strategic input on software solutions.

Project 4: Data Warehouse Management

Description: Migrated SSRS and Power BI reports from an on-premises Data Warehouse to the cloud while optimizing reporting and visualization processes.

Responsibility:

- Design, develop, and maintain the Data Warehouse and create valuable insights out of it.
- Develop simple and complex SQL queries based on the requirement.
- Create Stored procedures, Functions, and Views.
- Create Covering, Filtered Non clustered index to improve the performance.
- Optimizing the SQL query performance by tuning the SQL query.
- Creating, scheduling, and monitoring SQL Agent Job in SSMS.
- Debugging and fixing the SQL Agent Job failures.
- Creating the Integration solution to load data from any source to any destination.
- Created the SSIS packages by using transformations based on the requirement.
- Experience on Debugging, break points, Send Email task and event handlers in SSIS.
- Created Power BI Paginated reports based on the customer requirement.
- Knowledge of Azure Data Factory, Azure SQL Database, and Other Azure services.

Skills

- SQL
- MS SQL Server(SSMS)
- SQL Server Integration Services (SSIS)
- SQL Server Reporting Services (SSRS)
- Report Builder
- Power BI
- Power BI report Builder
- Power Apps
- Azure SQL Database
- Azure Data Factory
- Azure Storage
- Azure Logic Apps
- Azure Key Vault
- Power Automation

Education

2014 – 2018 **B.Tech: Electronics and Instrumentation Engineering. (9.28 CGPA)**
VR Siddhartha Engineering College, Vijayawada, AP.

2012 – 2014 **Intermediate: Maths Physics Chemistry (MPC). (92.8 %)**
Educare Junior college, Narasaraopet, AP.

2011 – 2012 **Secondary School (9.3 GPA)**
Sindhu High School, Narasaraopet, AP.

Certifications

- AZ-900 (Azure Fundamentals) Certified.
- DP-900 (Azure Data Fundamentals) Certified.
- AI-900 (Azure AI Fundamentals) Certified.
- PL-900 (Power Platform Fundamentals) Certified.
- Hacker Rank Certified: SQL Certified

Languages

- English
- Telugu
- Hindi

Declaration

I solemnly declare that all the details furnished above are true to the best of my knowledge.
